Facilities and Plant Managers

What are your site surveying and building design needs?
High Definition Survey (HDS) Services can meet your needs...

Prudential Center Complex

Cullinan Engineering Co., Inc. looks to the future with High Definition Survey Technology...

...for better retrofit designs that reduce construction costs and schedules.

...for safer, faster surveying and unobtrusive data capture.

...for better project control during construction.

...for more efficient operations and maintenance.

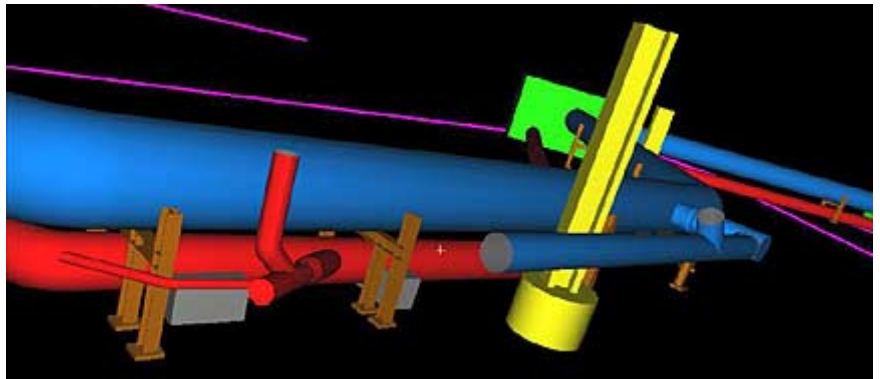

Save time and add value to your project.

Powerful, Cost-Effective Design Solutions

The application of laser scanning technology has been used to produce 3D mapping of:

- Master planning
- As-builts of buildings and facilities
- Profiles and area calculations
- Infrastructure and detail surveys
- Fabrication and construction inspection
- Interference checking
- Piping and industrial facilities
- Interior details
- Waste dumps

To schedule a High Definition Survey demonstration, please contact Kenneth Hodgson, Jr., PE at khodgson@cullinaneng.com.
